

## WORK EXPERIENCE

### JavaScript Developer

Denkwerk GmbH [link](#)

09/2019 - present *Cologne, Germany*

- Development of Web Applications using JavaScript frameworks and libraries such as React and Vue for clients and in-house projects.
- Successfully developed reusable frontend components and modules for the company's website.
- Develop unit tests to cover test cases.
- Perform code reviews and refactoring.

### Frontend Developer

Phnx Studio [link](#)

08/2018 - 09/2019 *Santo Domingo, DR.*

- Collaborated with in-house designers to create 3 custom WordPress templates from scratch.
- Developed Rich-media products for clients such as The New York Times.

### Frontend Developer

Theorem Creations [link](#)

10/2016 - 08/2018 *Santo Domingo, DR.*

- Successfully delivered around 13 landing pages within a tight timeframe each, for a client that used an in-house Content Management System.
- Assisted on staff training related to JavaScript technologies and dedicated client web products.
- Worked alongside Interactive Designers to deliver cross-platform products such as Web Applications, landing pages or animated banners.

### Web Developer Intern

IT Futures [link](#)

06/2016 - 08/2016 *Telford, UK.*

- Web Development Training that lasted 3 months alongside my university IT's team on the Telford Campus.
- Engaged directly with a client to get details of specifications for their online identity.
- Create & modify WordPress Plugins, Templates & Widgets.
